**ACTIVITY 4A: STUDENT WORKSHEET**

**LEARNING STYLE DATA SHEET**

1. **Tallies:**
   a. Total number of checks _____.  
   b. Total number of checks for items 1–5 _____ □ Section 1  
   c. Total number of checks for items 6–10 _____ □ Section 2  
   d. Total number of checks for items 11–15 _____ □ Section 3  
   e. Total number of checks for items 16–20 _____ □ Section 4  
   f. Total number of checks for items 21–25 _____ □ Section 5  
   g. Total number of checks for items 26–30 _____ □ Section 6  
   h. Total number of checks for items 31–35 _____ □ Section 7  
   i. Total number of checks for items 36–40 _____ □ Section 8  

2. **Ratios and percentages:**
   a. Make a ratio for each learning style by comparing the number of checks in each section to your total number of checks.
   b. Calculate the percentage of the inventory results that this represents.

   \[
   \text{Ratio} = \frac{\text{# of checks for items in each section}}{\text{total # of checks}} \quad \text{(reduce to lowest form)}
   \]

   Find percentage by dividing the lower number into the upper number, then multiplying by 100.
