

## **ACTIVITY 2E: NO BONES ABOUT IT—WHICH ANIMAL IS THIS?**

### **Answer Key**

1. Camel
2. Dog
3. Gorilla
4. Cat
5. Pig
6. Fish
7. Buffalo
8. Giraffe
9. Elephant
10. Horse
11. Chicken
12. Bear

### **Discussion Questions for Class**

How many skeletons could you identify? What helped you identify the skeletons?

Did all of the skeletons appear to have the same number of small bones in their spines?

What skeletal features other than the spine do vertebrate animals have in common?

The skeleton provides a framework (shape) for our bodies. When you stand up straight, your skeleton is probably only about one inch shorter than your height. How tall are you?

Subtract one inch and that is how tall your skeleton is. How tall is your skeleton?
